

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN
ACTUARIAL SCIENCE CLUB PRESENTS

Actuarial Innovations to Emerging Risks

RISKS ANALYTICS SYMPOSIUM 2021
MARCH 27, 2021 | [ACCELEVENTS.COM](https://accelevents.com)

A NEW VIRTUAL ERA

RISKS ANALYTICS SYMPOSIUM 2021

Although last year's Spring Symposium, Beyond the Horizon, was cancelled due to concerns regarding COVID-19, the Actuarial Science Club found an alternative that ensures a safe, yet interactive event for 2021. Coming to a computer screen near you, this year's Spring Symposium is being hosted on Accelevents, a virtual event platform, with many networking capabilities and top rated customer service. This adaptable platform allows experts from any location or actuarial industry to present and discuss their innovative solutions that are working to combat this year's emerging risks.

- *Supports up to 100,000+ attendees and accommodates different timezones*
- *Main stage events, group discussions, Q&A capabilities, and 1:1 networking sessions*
- *Many video capabilities for speakers*
- *Informational event page including an agenda*
- *Confirmation and reminder emails*
- *Top rated customer support*

EMERGING RISKS OF 2021

AND ACTUARIAL SOLUTIONS

1 - Cyber Risk

Combatting cyber risk challenges in the home office

- *UIUC Actuarial Science Club members and event sponsors- \$0*
- *UIUC Current Students- \$5*
- *Non-UIUC Current Students and UIUC Alumni - \$10*
- *General Admission - \$25*

PAST SYMPOSIUM SUCCESS

For the past two years, the actuarial science community at UIUC has welcomed several successful business leaders to share their revolutionary insights at the Annual Spring Symposium.

At the InsureTech and Actuarial Modernization Symposium, speakers from Crossbodr, CNA, and Root Insurance guided listeners into a thorough analysis of InsureTech, actuarial science, and data science. Following their cutting edge presentations, Deloitte presenters enlightened the audience with their extensive knowledge on actuarial modernization.

At the Beyond the Horizon Symposium, speakers from Oliver Wyman were confirmed to demonstrate methods for validating InsureTech results using real-world examples. Actuaries from RGA and Alta Advisors were committed to discussing the cross-sections of AI, automation, and actuarial science.

We could not have achieved this amount of success without the support and cooperation of our sponsors, shown here.
